APPENDICES

FOREWORD

In 1927, the International Association of Chiefs of Police established an advisory group comprising law enforcement executives, criminologists, specialists in public administration, and public officials. Their task was to develop a program for the compilation of crime statistics in the United States. In 1930, their job completed, the administration of the new Uniform Crime Reporting Program was assumed by the FBI.

For over 60 years the program has operated successfully and has benefited not only law enforcement but Federal, state, and local governments as well. The data have been utilized by those in the academic field to measure the effects of crime on the populace and to identify areas for social reform.

As the official recipient of the data for the Department of Justice, the FBI has benefited greatly from the close harmony and comradeship with local law enforcement which has grown through managing the program. The willingness of over 16,000 law enforcement jurisdictions, which represent 96 percent of the population of the United States, to voluntarily participate in the Uniform Crime Reporting Program attests to its importance and stature.

Each year when Crime in the United States is published and when preliminary reports are released, the data are eagerly awaited by those who seek to improve society, the home, and the workplace. They are also utilized by news media, tourism agencies, and others with an interest in crime in our Nation. Often, however, the data are used to rank cities and counties based on their Crime Index figures. Such rankings sometimes create improper perceptions which adversely affect those living and working in the identified cities. Those in law enforcement who so carefully collect and report the statistics are done a great disservice by less than judicious examination of the data and other relevant factors contained within the confines of the publication.

I believe it is incumbent upon all who would seek to use Uniform Crime Reporting data to become as well educated as possible when attempting to quantify the nature and extent of crime in the United States. To do less is an affront to those men and women who place their lives on the line through serving the public in the law enforcement field. Valid assessments of the Nation's crime problem are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

William S. Sessions Director

Willem Serron

CRIME FACTORS

Each year when Crime in the United States is published many entities—news media, tourism agencies, and others with an interest in crime in our Nation—compile ranking of cities and counties based on their Crime Index figures. This simplistic and incomplete analysis often creates improper perceptions which adversely affect cities and counties along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of Census data, for example, can be utilized to better understand the makeup of the locale's population. The transience of the population, its racial and ethnic makeup, its age and sex structure, education levels, and prevalent family structure are all key factors in assessing and better understanding the crime issues.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its dependence on non-residents (such as tourists and convention attendees), proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from the city or county chamber of commerce, planning/information office, or similar entity.

The strength (personnel and other resources) and the aggresiveness of the law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts, such as "sting operations," identify more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible when attempting to categorize and quantify the nature and extent of crime in the United States and in any of the almost 16,000 jurisdictions represented by law enforcement contributors to this Program. This is only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which have been determined to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area. Variations in composition of the population, particularly youth concentration.

Stability of population with respect to resident's mobility, commuting patterns, and transient factors.

Modes of transportation and highway system.

Economic conditions, including median income, destitution, and job availability.

Cultural conditions, such as educational, recreational, and religious characteristics.

Family conditions with respect to divorce and family cohesiveness.

Climate.

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Attitudes of citizenry toward crime.

Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.

SECTION I

SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of approximately 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense

definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers Advisory Policy Board was established in August, 1988. The Board is comprised of 20 city, county, and state law enforcement executives, representing the four geographic regions of the Nation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Methods of Data Collection

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the

42 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to

the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larcenytheft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and

law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The Uniform Crime Reporting Handbook, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the Manual of Law Enforcement Records.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000. Contiguous counties which meet specified criteria of metropolitan character and integration, designated suburban counties in UCR, are included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

"Other cities," most of which are incorporated, and rural counties are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of

cities with fewer than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1989, law enforcement agencies active in the UCR Program represented approximately 238 million United States inhabitants, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 94 percent of the population in "other cities," and 88 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Population Data

Current year population figures for the Nation, states, geographic regions, and divisions are Bureau of the Census provisional estimates as of July 1, 1989. Using these figures along with the 1988 Bureau of the Census provisional estimates for counties and cities, the populations of individual jurisdictions were extrapolated (see Appendix III). The estimated United States population increase in 1989 was approximately 1 percent over the 1988 estimate.

Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 through 1989 forcible rape figures for the State of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rape totals are not shown in Tables 6, 7, 8, 9, and Appendix V, which present individual MSA, city, county, and university/college data for Illinois agencies. Since the

data supplied were not comparable with those provided for other agencies across the country, the post-1984 forcible rape figures have been estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally.

Due to reporting problems at the state levels, no usable 1988 data were received for local law enforcement agencies in Florida and Kentucky. For Tables 1 and 4 of this publication, 1988 offense totals for these two states were estimated. Previous valid annual totals, by population group, were updated for the states by applying percentage changes for each offense within each population group of the geographic division in which the state resides. The state totals were compiled from the sums of the population group estimates. Reporting recommenced for both states during 1989, and usable data were received.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive threephase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the

requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, the FBI's Technical Services Division developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate needed software revisions. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System or NIBRS, is contained in three documents produced subsequent to the Orange Beach Conference. Volume 1, Data Collection Guidelines, contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, Data Submission Specifications, is for the use of state and local systems personnel who are responsible for preparing magnetic tapes for submission to the FBI. Volume 3, Approaches to Implementing an Incident-Based Reporting (IBR) System, is for use by computer programmers, analysts, etc., responsible for developing a state or local IBR system which will meet NIBRS' reporting requirements.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The

integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than can the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

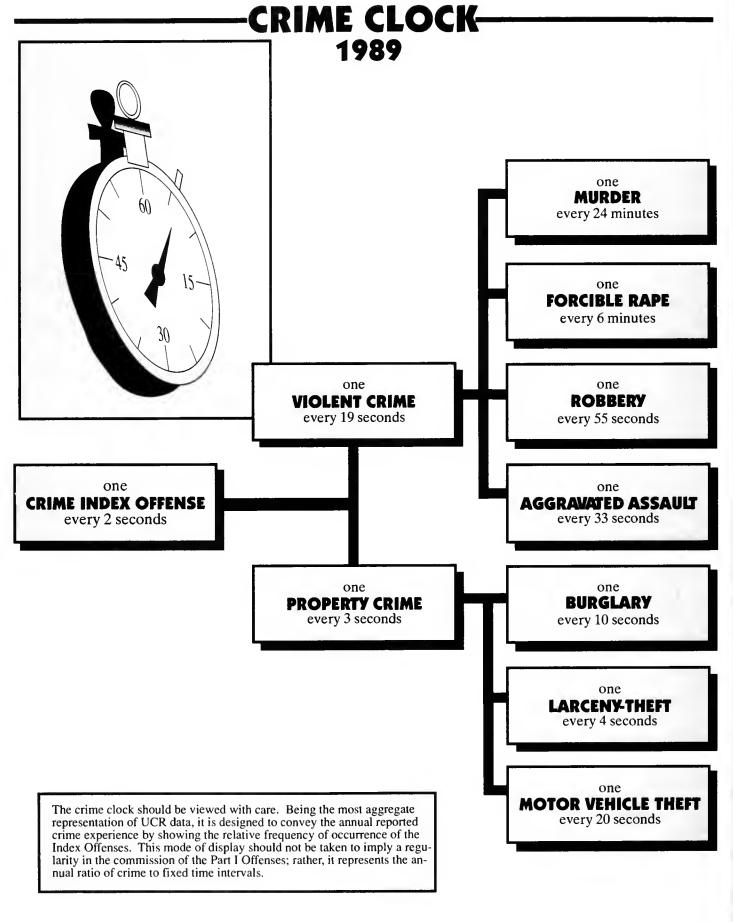

The implementation of NIBRS will be at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January, 1989, and five state-level UCR Programs have now submitted test tapes containing the expanded data. Twenty-five other Programs are in various stages of planning and development and are expected to be reporting to some degree by the end of 1991.

Recent Developments

FEDERAL CRIME REPORTING-In 1988, the U. S. Congress passed the Uniform Federal Crime Reporting Act, mandating Federal law enforcement participation in UCR effective January, 1989. Plans to implement NIBRS, the redesigned UCR Program, at the Federal level are underway, and the Department of the Interior has agreed to act as the pilot agency for testing Federal participation requirements. The FBI has provided supplemental NIBRS guidelines for Federal law enforcement, and several agencies project submission will begin with the 1991 reporting year. Data produced as a result of this Act should be of tremendous benefit to all levels of law enforcement, to the Executive and Legislative Branches, and to many other interests.

HATE CRIME STATISTICS—The Hate Crime Statistics Act, passed by the U. S. Congress and signed by the President in April, 1990, mandates a 5-year data collection of crimes motivated by religious, ethnic, racial, or sexual-orientation prejudice. With the expectation that the responsibility for the collection will be delegated to the UCR Program, plans are being made to solicit the information. As currently conceived, UCR contributors will have the choice of reporting bias-suspected crimes either in connection with their NIBRS data submissions or through the use of a separate report form.

ADVISORY POLICY BOARD-In accordance with its responsibility to offer guidance to UCR concerning data collection and dissemination, the Board recently established two subcommittees. One will provide input concerning the establishment of procedures for collecting statistics on hate crimes. The other will examine output from UCR's program on Law Enforcement Officers Killed and Assaulted.

SECTION II CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

_ DEFINITION ____

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

_____ TREND _____

Year	Number of offenses	Rate per 100,000 inhabitants
1988	20,675	8.4
1989	21,500	8.7
Percent change	+4.0	+3.6

Volume

The total number of murders in the United States during 1989 was estimated at 21,500 or 1 percent of the violent crimes reported. More persons were murdered in July than any other month, while the fewest were killed during February.

Murder by Month, 1985-1989

[Percent of annual total]

Months	1985	1986	1987	1988	1989
January	8.1	7.7	7.7	8.2	8.1

November	8.2	8.0	8.3	8.2	8.5
December	9.4	8.4	9.1	9.2	8.7

When viewing the four regions of the Nation, the Southern States the most populous, accounted for 43 percent of the murders. The Western States reported 20 percent; the Midwestern States, 19 percent; and the Northeastern States, 18 percent.

Trend

The murder volume was up 4 percent nationwide in 1989 over 1988. The Nation's cities overall experienced an increase of 6 percent, with upward trends recorded in all but two city population groupings. Of the cities, those with populations of 25,000 to 49,999 registered the greatest increase, 14 percent. Suburban counties recorded a 1-percent rise, while the rural counties registered a 3-percent decline.

All regions experienced more murders during 1989 than in 1988. The number of murders was up 6 percent in the

South; 4 percent in both the Northeast and Midwest; and 1 percent in the West.

The accompanying chart reveals a 13-percent rise nationally in the murder counts from 1985 to 1989. The 10-year trend showed the 1989 total 7 percent below the 1980 level, when the national murder total was at an all-time high.

Rate

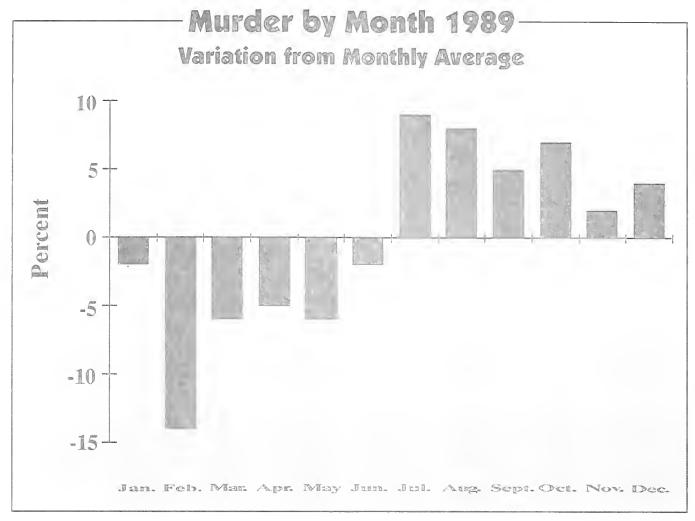

Up 4 percent from 1988, the 1989 United States murder rate was 9 per 100,000 inhabitants. On a regional basis, the Southern States averaged 11 murders per 100,000 people; both the Western and Northeastern States, 8 per 100,000; and the Midwestern States, 7 per 100,000. Compared to 1988, murder rates in 1989 increased 5 percent in the South; 4 percent in the Northeast; and 3 percent in the Midwest. The murder rate in the West was down 2 percent.

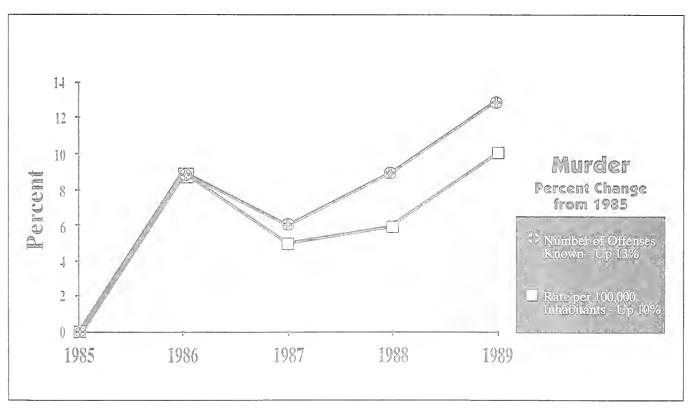

The Nation's metropolitan areas reported a 1989 murder rate of 10 victims per 100,000 inhabitants. The rural counties, as well as cities outside metropolitan areas, registered a lower rate of 5 per 100,000.

Nature

Supplemental data provided by contributing agencies recorded information for 18,954 of the estimated 21,500 murders in 1989. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 76 percent of the murder victims in 1989 were males; and 90 percent were persons 18 years of age or older. Forty-nine percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 50 of every 100 were black, 49 were white, and the remainder were persons of other races.

Data based on incidents involving one victim and one offender showed that in 1989, 94 percent of the black murder victims were slain by black offenders, and 86 percent of the white murder victims were killed by white

offenders. Likewise, males were most often slain by males (84 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 3 of every 5 murders committed in the United States. Of those murders for which weapons were reported, 48 percent were by handguns, 6 percent by shotguns, and 5 percent by rifles. Other or unknown types of firearms accounted for another 4 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 18 percent of the murders; blunt objects (clubs, hammers, etc.) in 6 percent; other dangerous weapons, such as poison, explosives, etc., in 8 percent; and personal weapons (hands, fists, feet, etc.) in the remainder.

Over half the murder victims in 1989 were related to (15 percent) or acquainted with (39 percent) their assailants. Thirteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 33 percent of the murders. Among all female murder victims in 1989, 28 percent were slain by husbands or boyfriends. Five percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 35 percent of the murders during the year. Twenty-one percent occurred as a result of felonious activities such as robbery, arson, etc., while another I percent were suspected to have been the result of some felonious activity. Four percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. The table on the following page shows murder circumstances for the past 5 years.

Clearances

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide, as well as in the cities, were successful in clearing 68 percent of the murders occurring in their jurisdictions during 1989. Cities with populations from 10,000 to 24,999 reported the most successful clearance rate, 79 percent. Seventy-five percent of murders in rural counties and 69 percent of those in suburban counties were cleared.

Regionally, the Southern and Midwestern States registered the highest clearance rate, 73 percent. Sixty-five percent were cleared in the Western States and 60 percent in the Northeastern States.

Persons under 18 years of age accounted for 7 percent of the willful killings cleared by law enforcement nationally, as well as in the Nation's cities during 1989. This proportion of juvenile involvement was lower than for any other Index offense. Five percent of the suburban county and 4 percent of the rural county clearances involved only persons in this young-age group.

Persons Arrested

Forty-nine percent of all murder arrestees in 1989 were under 25 years of age. The 18- to 24-year age group accounted for 36 percent of the total.

Eighty-eight percent of those arrested were males and 12 percent, females. Blacks comprised 56 percent of the total arrestees for murder in 1989. Whites made up 42 percent, and the remainder were of other races.

The 1989 murder arrest total increased 5 percent above the 1988 figure. Arrests of persons aged 18 and over increased 3 percent, while those of younger persons were up 18 percent. During the same 2-year period, male arrests increased 5 percent and female arrests were up 2 percent.

Long-term trends indicate the 1989 murder arrest total was 16 percent above the 1985 level and 11 percent higher than the 1980 figure.

Includes murders committed during brawls while offender was under the influence of alcohol and/or narcotics.

FORCIBLE RAPE

DE	TOT	MI	TTI	$\mathbf{\Omega}$	N.T.
IJF.	гı	1			

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

	TREND	
Year	Number of offenses	Rate per 100,000 inhabitants
1988	92,486	<i>37</i> .6
1989	94,504	38.1
Percent change	+2.2	+1.3

Volume

During 1989, there were an estimated 94,504 forcible rapes in the Nation. Rape offenses comprised 6 percent of the total violent crimes. Geographically, the Southern States, the region with the largest population, accounted for 37 percent of the forcible rapes reported to law enforcement. Following were the Midwest with 25 percent, the West with 23 percent, and the Northeast with 15 percent.

Monthly totals showed the greatest number of forcible rapes was reported during the summer, with July recording the highest frequency. The lowest total was registered in February.

December	6.9	7.0	7.3	6.8	7.3

Trend

Compared to the previous year, the 1989 forcible rape volume increased 2 percent nationwide. In the cities collectively, the total was up 1 percent. The rural counties recorded a 12-percent increase and the suburban counties, a 5-percent rise. City trends ranged from 6-percent increases in those with populations of 10,000 to 24,999 and 50,000 to 99,999 to a 4-percent decline in cities with 500,000 or more inhabitants.

Geographically, three of the four regions reported higher forcible rape volumes in 1989 as compared to 1988. The increases were 4 percent in the Western States, 3 percent in the Southern States, and 2 percent in the Midwestern States. The Northeastern States recorded the only decrease, 2 percent.

National trends for 5 and 10 years show that the forcible rape total rose 7 percent over 1985 and 14 percent above 1980.

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1989, an estimated 75 of every 100,000 females in the country were reported rape

victims, an increase of 2 percent from the 1988 rate. Since 1985, the female forcible rape rate has risen 3 percent.

Female forcible rape rates for 1989 showed there were 83 victims per 100,000 females in MSAs, 53 per 100,000 females in cities outside metropolitan areas, and 41 per 100,000 females in rural counties.

Regionally, the highest female rape rate was in the Western States, which recorded 83 victims per 100,000 females. Following were the Southern States with a rate of 80, the Midwestern States with 76, and the Northeastern States with 55.

Nature

Of all reported forcible rapes during 1989, 83 percent were rapes by force. The remainder were attempts or assaults to commit forcible rape. A 4-percent increase was registered in the number of rapes by force, while attempts to commit rape decreased 5 percent from the 1988 figure.

Clearances

Nationwide and in the cities, 52 percent of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means in 1989. Rural county law enforcement agencies cleared 55 percent of the offenses brought to their attention, while suburban county agencies cleared 51 percent.

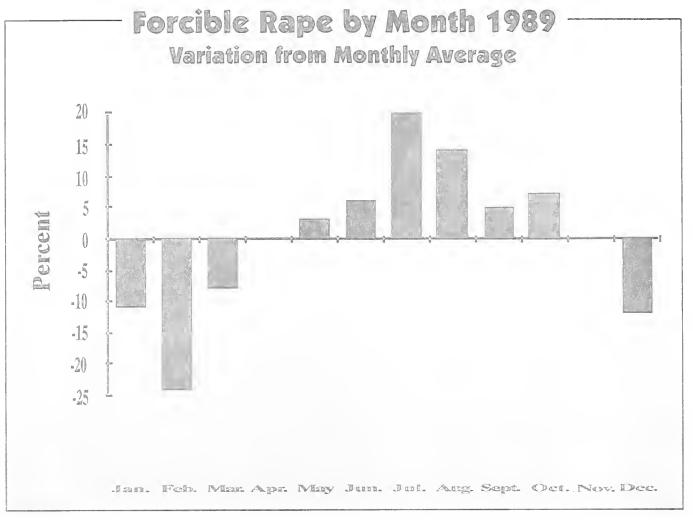

Clearance rates for the regions ranged from 46 percent in the Midwestern States to 59 percent in the Southern States. In the Northeastern States, the clearance rate for forcible rape was 54 percent, and in the Western States, it was 49 percent.

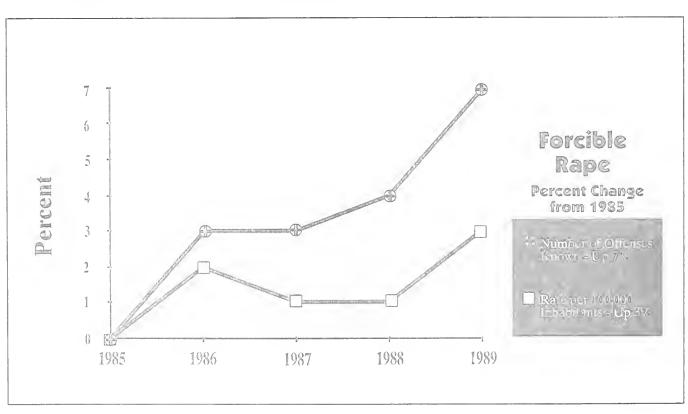

Of the total clearances for forcible rape in the country as a whole, 10 percent involved only persons under 18 years of age. The rural and suburban counties also recorded a 10-percent involvement of this age group, while in the Nation's cities, only persons under 18 accounted for 9 percent of the forcible rape clearances.

Persons Arrested

The number of arrests for forcible rape rose 1 percent nationwide from 1988 to 1989. Arrests for this offense rose 8 percent in the rural counties and 6 percent in the suburban counties. The Nation's cities experienced a 1-percent decline in forcible rape arrests. For the 5-year period, 1985 to 1989, the total forcible rape arrests, those of adults, and of persons under 18 years of age showed virtually no change.

Of the forcible rape arrestees in 1989, 44 percent were persons under the age of 25, with 28 percent of the total being in the 18- to 24-year age group. Fifty-two percent of those arrested were white, 47 percent were black, and the remainder, other races.

ROBBERY

_ DEFINITION ___

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1988	542,968	220.9
1989	578,326	233.0
Percent change	+ 6.5	+ 5.5

Volume

Estimated at 578,326 offenses in 1989, robbery accounted for 4 percent of all Index crimes and 35 percent of the crimes of violence. During the year, robberies occurred most frequently in December and least often in April.

Robbery by Month, 1985-1989

[Percent of annual total]

Months	1985	1986	1987	1988	1989
January	8.6	8.7	8.9	8.6	8.8
February	7.4	7.7	8.1	7.9	7.4
March	7.9	8.2	8.2	8.0	8.0
April	7.3	7.6	7.5	7.3	7.3
May	7.5	7.7	7.5	7.6	7.6
June	7.7	8.0	7.6	7.6	7.6
July	8.6	8.4	8.3	8.4	8.4
August	8.9	9.3	8.7	8.7	8.6
September	8.4	8.6	8.5	8.7	8.6
October	9.1	8.7	8.8	9.1	9.2
November	8.8	8.3	8.5	9.0	9.0
December	9.7	9.0	9.2	9.2	9.3

Distribution figures for the regions showed that the most populous Southern States registered 32 percent of all reported robberies. Following were the Northeastern States with 28 percent, the Western States with 21 percent, and the Midwestern States with the remainder.

Trend

Upward trends in robbery were evident nationwide and throughout all population groups in 1989. Nationally and in cities overall, the 1989 robbery volume was 7 percent higher than the 1988 level. The suburban counties experienced a 6-percent increase in robberies, and the rural counties, a 2-percent rise. Of the cities, those with populations of 250,000 to 499,999 registered the greatest increase, 9 percent.

Two-year trends show the number of robberies in 1989 was up in all four regions as compared to 1988. The increases were 8 percent in both the Northeast and the West and 5 percent in the South and the Midwest.

The accompanying chart depicts the trend in the robbery volume, as well as the robbery rate, for the years 1985-1989. In 1989, the number of robbery offenses was 16 percent higher than in 1985 and 2 percent above the 1980 total.

Rate

The national robbery rate in 1989 was 233 per 100,000 people, 5 percent higher than in 1988. In metropolitan

areas, the robbery rate was 293; in cities outside metropolitan areas, it was 58; and in the rural areas, it was 16. With 992 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants.

A comparison of 1988 and 1989 regional rates showed an 8-percent increase in the Northeast, which had a rate of 323 per 100,000 population. The rates of 236 in the West and 177 in the Midwest were each up 5 percent, and the South's rate of 217 was 4 percent higher.

Nature

In 1989, a total estimated national loss of \$405 million was due to robberies. The value of property stolen during robberies averaged \$701 per incident. Average dollar losses ranged from \$364 taken during robberies of convenience stores to \$3,591 per bank robbery. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

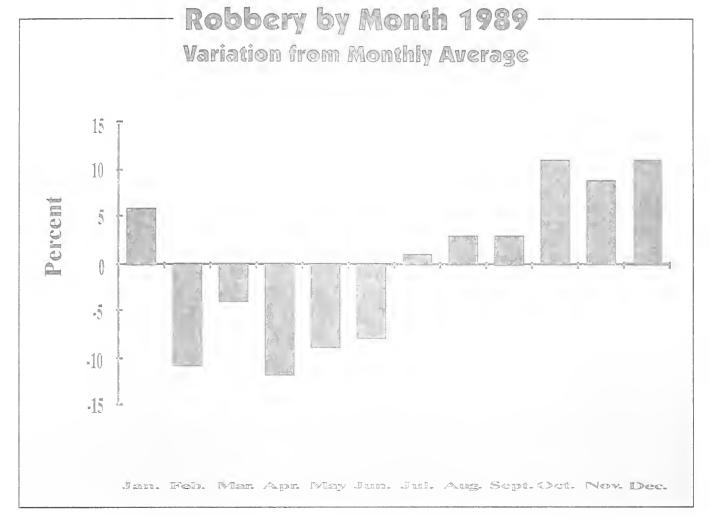

As in previous years, robberies on streets or highways accounted for more than half (55 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types. By type, all categories of robbery showed increases from 1988 to 1989. The increases ranged from 1 percent for residential robberies to 9 percent for street/highway robberies.

Forty-three percent of all robberies in 1989 were committed through the use of strong-arm tactics. Firearms were used in 33 percent, knives or cutting instruments in 13 percent, and other weapons in the remainder. A comparison of 1988 and 1989 robbery totals by weapon showed those by both strong-arm tactics and firearms were up 8 percent; those by knives or cutting instruments rose 3 percent; and those by other dangerous weapons increased 6 percent.

Because of rounding, percentages may not add to totals.

Clearances

Twenty-six percent of the robbery offenses reported to law enforcement were cleared during 1989. The highest robbery clearance rate — 39 percent — was registered by

rural county law enforcement agencies. Suburban county agencies cleared 30 percent and those in cities, 26 percent. Regional robbery clearance percentages were 30 percent in the South, 26 percent in the West, 24 percent in the Northeast, and 23 percent in the Midwest.

Nationally and in cities, persons under the age of 18 were the offenders in 11 percent of all 1989 robbery clearances. This age group accounted for 9 percent of the suburban county clearances and 5 percent of the rural county clearances.

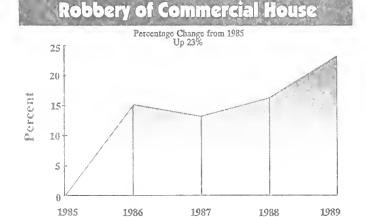

Persons Arrested

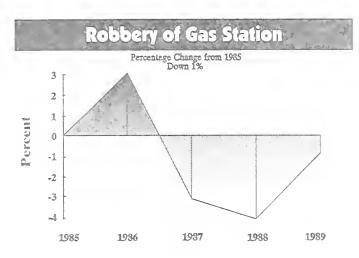

Arrests for robbery rose 10 percent nationwide during 1989 when compared to 1988. For the same 2-year period, increases in the number of persons arrested for robbery were 11 percent in the cities collectively, 5 percent in the suburban counties, and 1 percent in the rural counties.

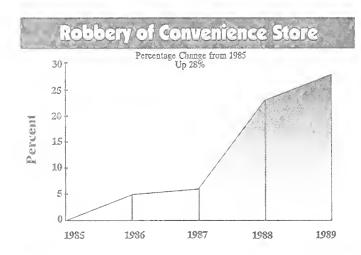

Sixty percent of all robbery arrestees in 1989 were under 25 years of age, and 91 percent were males. Sixty-five percent of those arrested were black, 34 percent were white, and the remainder were of other races.

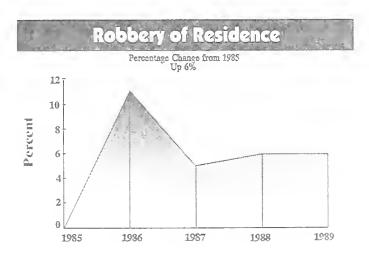

The total number of robbery arrests was up 14 percent during the 5-year period, 1985-1989. For the same timespan, arrests of females for robbery jumped 28 percent, and male arrests increased 13 percent. Juvenile arrests rose 1 percent, and those of persons 18 years of age and older increased 19 percent.

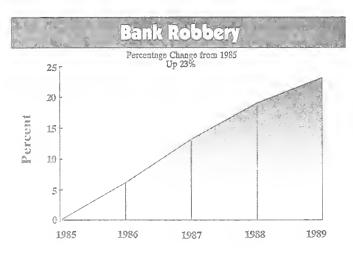

Street Robbery Percentage Change from 1985 Up 18% 1.2

AGGRAVATED ASSAULT

_ DEFINITION ___

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Т	R	F	N	n

Year	Number of offenses	Rate per 100,000 inhabitants
1988	910,092	370.2
1989	951,707	383.4
Percent change	+4.6	+3.6

Volume

Totaling an estimated 951,707 offenses nationally, aggravated assaults in 1989 accounted for 58 percent of the violent crimes. Geographic distribution figures show that 37 percent of the aggravated assault volume was accounted for by the South, 25 percent by the West, and 19 percent each by the Northeast and Midwest.

The 1989 monthly figures show that the greatest number of aggravated assaults was recorded during July, while the lowest volume occurred in February.

Aggravated Assault by Month, 1985-1989

[Percent of annual total]

Months	1985	1986	1987	1988	1989
January	7.0	6.8	7.3	7.2	7.5
February	6.8	6.3	7.0	7.0	6.6
March	8.2	8.0	7.8	7.9	7.9
April	8.2	8.1	8.1	8.1	8.1
May	8.8	9.1	8.9	8.9	8.9
June	9.0	9.7	8.9	9.0	8.9
July	9.5	10.0	9.5	9.8	9.6
August	9.5	10.0	9.5	9.8	9.2
September	8.9	8.8	8.7	9.0	8.8
October	8.8	8.3	8.5	8.4	9.1
November	7.9	7.6	7.9	7.5	7.9
December	7.4	7.4	7.8	7.5	7.5

Trend

In 1989, aggravated assaults were up nationwide, as well as in all regions and population groups, as compared to 1988. The Nation and all cities collectively each recorded 5-percent increases, while the suburban and rural counties experienced 4-percent jumps for the 2-year period. By population grouping, cities with 100,000 to 249,999 inhabitants recorded the greatest rise, 8 percent. During the same time period, the South and West registered 6-percent upswings in their aggravated assault volumes, while increases of 3 and 2 percent were recorded in the Midwest and Northeast, respectively.

Five- and 10-year trends show aggravated assaults up 32 percent above the 1985 level and 41 percent over the 1980 experience.

Rate

Up 4 percent above the 1988 rate, there were 383 reported victims of aggravated assault for every 100,000

people nationwide in 1989. The rate was 27 percent higher than in 1985 and 28 percent above the 1980 rate.

Higher than the national average, the rate in metropolitan areas was 435 per 100,000 in 1989. Cities outside metropolitan areas experienced a rate of 304, and rural counties, a rate of 147.

Regionally, the aggravated assault rates ranged from 468 per 100,000 people in the West to 306 per 100,000 in the Midwest. The rate in the South for 1989 was 406, and in the Northeast, 351. In the South, the rate was up 5 percent in 1989 over 1988. The Midwest and the West each showed rate increases of 3 percent, while the rate in the Northeast rose 2 percent.

Nature

In 1989, 32 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 27 percent of the offenses; firearms in 22 percent; and knives or cutting instruments in the remainder.

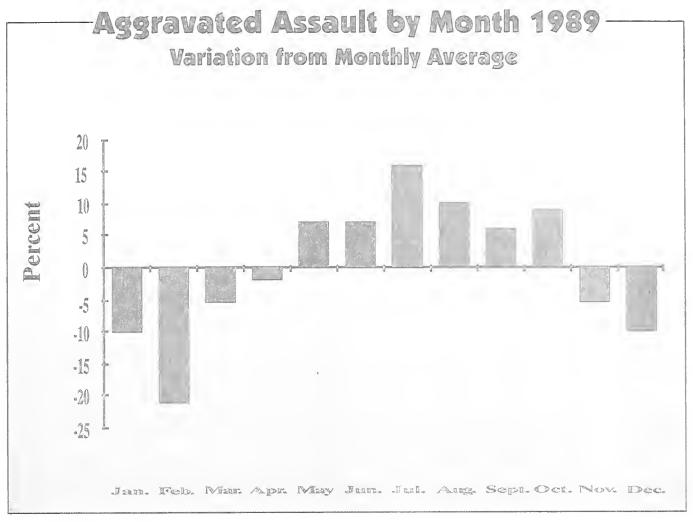

Assaults with firearms showed the greatest increase from 1988 to 1989, 8 percent. Those committed with knives or cutting instruments were up 1 percent, those involving blunt objects or other dangerous weapons increased 6 percent, and those in which personal weapons were used rose 4 percent.

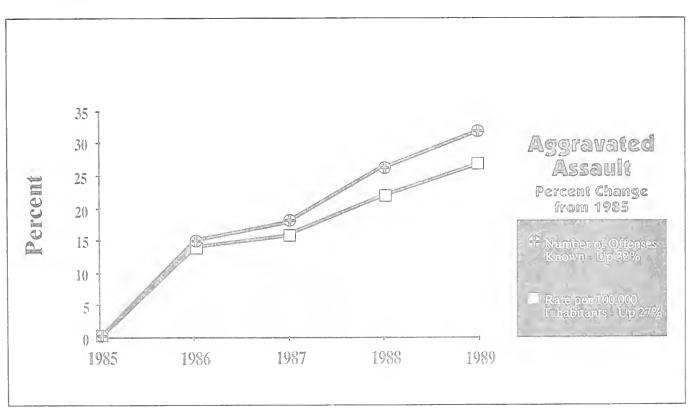

Aggravated Assault, Type of Weapons Used, 1989

[Percent distribution by region]

Region	Total all weapons ¹	Fire- arms	Knives or cutting instru- ments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	21.5	19.9	31.9	26.8
Northeastern States	100.0 100.0 100.0 100.0	16.3 23.6 25.3 19.5	22.5 20.5 22.0 15.4	34.9 32.9 30.7 30.1	26.3 23.1 22.0 34.9

¹Because of rounding, percentages may not add to totals.

Clearances

During 1989, law enforcement agencies nationwide cleared 57 percent of the aggravated assaults reported. The cities collectively reported a 56-percent clearance rate, while the suburban and rural county law enforcement agencies cleared 59 and 64 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest clearance rate, 66 percent.

Regional clearance percentages for aggravated assault were 59 percent in the Southern States, 58 percent in the Western States, 55 percent in the Midwestern States, and 53 percent in the Northeastern States.

Ten percent of the clearances reported by city agencies involved only persons under age 18. Persons in this age group were identified as the assailants in 9 percent of the national clearances, 8 percent of the suburban county clearances, and 6 percent of those in rural counties.

Persons Arrested

The estimated 459,000 persons arrested for aggravated assault in 1989 represented 67 percent of all arrestees for violent crimes. Whites comprised 57 percent of the arrestees; blacks, 41 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were males and 13 percent, females.

Total arrests, as well as arrests of adults, for aggravated assault were up 9 percent in 1989 from the 1988 total. During this 2-year period, arrests of persons under age 18 increased 15 percent. A comparison of 1985 and 1989 figures showed increases of 49 percent for total arrests, 40 percent for juvenile arrests, and 50 percent for adult arrests.

BURGLARY

D	E	C	T	N	T	т	14	^	N	1
.,	r.	r	Ł	IN			ш	.,	11.	ч

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

_____ TREND _____

Year	Number of offenses	Rate per 100,000 inhabitants
1988	3,218,077	1,309.2
1989	3,168,170	1,276.3
Percent change	-1.6	-2.5

Volume

An estimated 3,168,170 burglaries occurred in the United States during 1989. These offenses accounted for 22 percent of the total Crime Index and 25 percent of the property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the most populous Southern States, accounting for 42 percent of the total. The Western States followed with 23 percent, the Midwestern States with 19 percent, and the Northeastern States with 16 percent.

Like the previous year, more burglaries occurred in August than any other month. The lowest number was reported in February.

Burglary by Month, 1985-1989

[Percent of annual total]

Months	1985	1986	1987	1988	1989
January	8.2	8.4	8.4	8.4	8.8
February	7.2	7.5	7.8	7.8	7.3
March	8.2	8.3	8.3	8.1	8.2
April	7.8	7.9	7.6	7.5	7.7
May	8.0	8,1	8.0	8.1	8.4
June	7.9	8.1	8.0	8.0	8.3
July	9.0	8.9	8.8	8.8	9.2
August	9.1	9.0	9.1	9.3	9.3
September	8.5	8.5	8.4	8.6	8.6
October	9.0	8.4	8.4	8.5	8.5
November	8.5	8.1	8.4	8.4	8.1
December	8.8	8.8	8.8	8.5	7.8

Trend

Nationwide, the burglary volume decreased 2 percent in 1989 from the 1988 total. By population groupings, the only increases were registered in cities under 10,000 in population, with a rise of less than one-half of 1 percent, and in the rural counties, 1 percent.

Geographically, all four regions of the United States reported decreases in burglaries during 1989 as compared to 1988. The declines were 2 percent in the Western and Midwestern States, and 1 percent in the Northeastern and Southern States.

Rate

A burglary rate of 1,276 per 100,000 inhabitants was registered nationwide in 1989. The rate fell 3 percent from 1988 and was 24 percent below the 1980 rate, the highest in history. In 1989, for every 100,000 in population, the

rate was 1,412 in the metropolitan areas, 1,040 in the cities outside metropolitan areas, and 673 in the rural counties.

Regionally, the burglary rate was 1,554 in the Southern States, 1,388 in the Western States, 1,013 in the Midwestern States, and 1,007 in the Northeastern States. A comparison of 1988 and 1989 rates showed decreases of 5 percent in the West, 3 percent in the Midwest, 2 percent in the South, and 1 percent in the Northeast.

Nature

Two of every 3 burglaries in 1989 were residential in nature. Seventy percent of all burglaries involved forcible entry, 22 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported showed that 49 percent happened during the daytime hours and 51 percent during the nighttime hours.

Burglary victims suffered losses estimated at \$3.4 billion in 1989, and the average dollar loss per burglary was \$1,060. The average loss for residential offenses was \$1,080, while for nonresidential property, it was \$1,023.

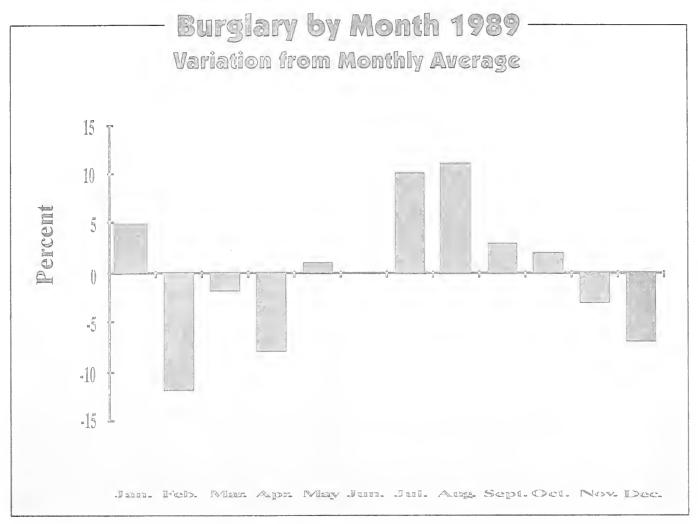

Residential burglary showed a 3-percent decline from 1988 to 1989; nonresidential offenses showed a 2-percent increase during the same period.

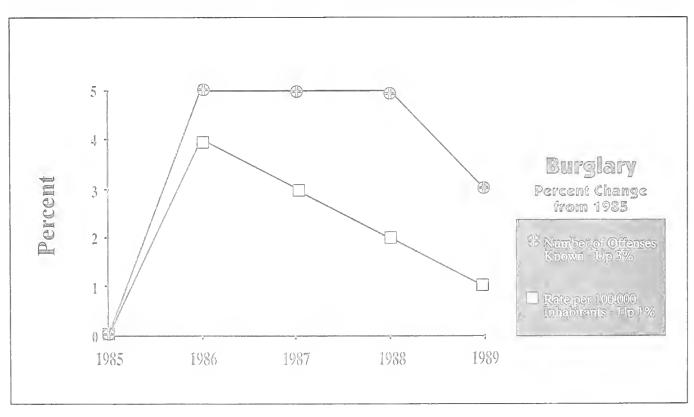

Clearances

Geographically, 14 percent of the burglaries brought to the attention of law enforcement agencies across the country and in the Northeast were cleared in 1989. In the South, the clearance rate was 16 percent; in the West, 13 percent; and in the Midwest, 12 percent.

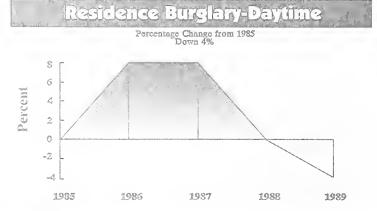

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Equivalent to the national experience, 14-percent clearance rates were recorded by agencies in cities and suburban counties.

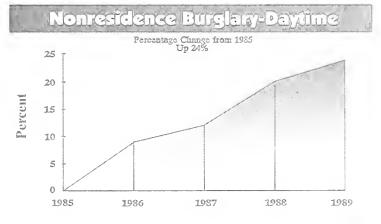

Adults were involved in 83 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 17 percent. Similar to the national experience, persons under age 18 accounted for 17 percent of the burglary clearances in cities. Suburban and rural county law enforcement agencies reported 18 and 19 percent, respectively, of their burglary clearances involved only juveniles. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 23 percent of the clearances.

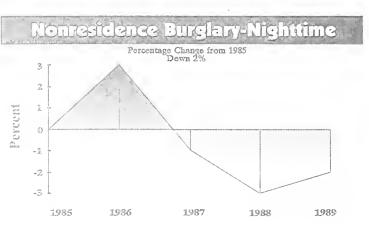

Residence Burglary-Nighttime Percentage Change from 1985 Down 2% б -1 -2

Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 468,900 arrests were made in 1989. Arrest trends between 1988 and 1989 show a 3-percent increase in total burglary arrests. Arrests of persons under 18 years of age dropped 1

percent, while those for adults rose 6 percent. For the same 2-year time period, total burglary arrests in cities and suburban counties were up 3 percent, while in the rural counties, they rose 9 percent in number.

Ninety-one percent of the burglary arrestees during 1989 were males and 65 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 66 percent, blacks for 32 percent, and other races for the remainder.

LARCENY-THEFT

D	E.	ΕĪ	N	IT	T	\mathbf{O}	N

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

December	8.1	8.3	8.4	8.3	7.7

Trend

Upward trends in the 1989 volume of larceny-thefts were evident nationwide and in all population groups when compared to 1988. The Nation, all cities collectively, and the suburban and rural counties each showed 2-percent increases. Regionally, volume upswings of 3 percent were recorded in both the Midwestern and the Southern States. The Western States registered a 2-percent increase, while the Northeastern States showed virtually no change.

The 5- and 10-year national trends indicated larceny was up 14 percent over the 1985 total and rose 10 percent above the 1980 level.

Rate

The 1989 larceny-theft rate was 3,171 per 100,000 United States inhabitants. While the 1989 rate was 1 percent higher than in 1988 and 9 percent above the 1985 level, it showed no change from 1980. The 1989 rate was 3,534 per 100,000 inhabitants of metropolitan areas; 3,380 per 100,000 population in cities outside metropolitan areas; and 995 per 100,000 people in the rural counties.

Regionally, the rates of 3,404 in the South and 2,936 in the Midwest were up 2 percent over 1988 levels. Showing no change from 1988, the 1989 rates per 100,000 inhabitants in the West and the Northeast were 3,633 and 2,586, respectively.

Nature

During 1989, the average value of property stolen due to larceny-theft was \$462, up from \$426 in 1988. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was \$3.6 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 24 percent of the thefts reported to law enforcement in 1989 ranged from \$50 to \$200, while in 35 percent, they were over \$200.

Losses of goods and property reported stolen as a result of pocket-picking averaged \$303; purse-snatching, \$244; and shoplifting, \$102. Thefts from buildings resulted in an average loss of \$747; from motor vehicles, \$502; and from coin-operated machines, \$153. The average value loss due to thefts of motor vehicle accessories was \$315 and for thefts of bicycles, \$204.

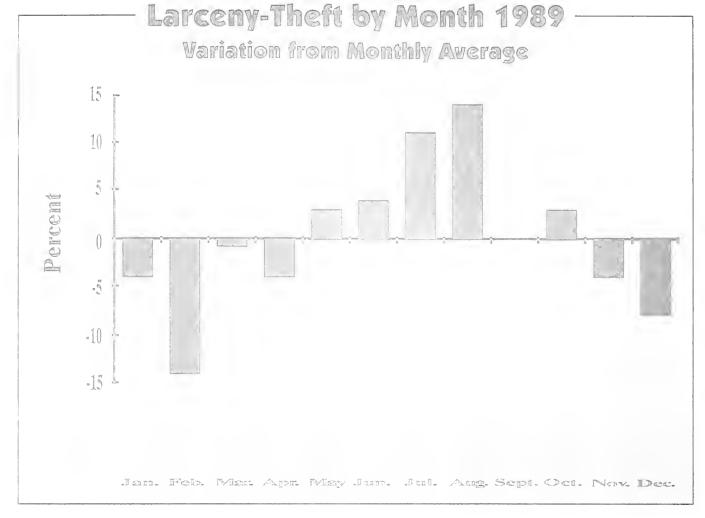

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—38 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 16 percent; thefts from buildings, 15 percent; and bicycle thefts, 5 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

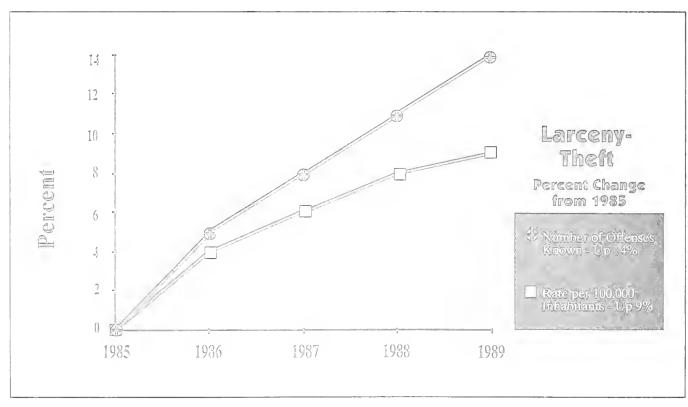

Larceny Analysis by Region, 1989

[Percent distribution]

	United States Total	North- eastern States	Mid- western States	Southern States	Western States
Total ¹	100.0	100.0	100.0	100.0	100.0

All others	23.7	17.2	25.5	29.6	19.4

¹Because of rounding, percentages may not add to totals.

Clearances

Twenty percent of the reported larceny-thefts were cleared nationwide during 1989. The cities collectively recorded a 21-percent clearance rate, with the highest rate, 25 percent, reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Those in suburban and rural counties recorded 17-percent and 18-percent clearance rates, respectively.

In 1989, law enforcement agencies in the Western States cleared 21 percent of the larceny offenses brought to their attention. The clearance rates in the Southern and Midwestern States were 20 percent, and in the Northeast, 19 percent.

Twenty-one percent of the larceny-theft clearances nationally and in the cities involved only offenders under 18 years of age. Nineteen percent of those in suburban counties and 16 percent of those in rural counties were accounted for by persons in this age group.

Persons Arrested

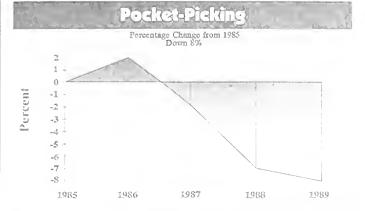

Between 1988 and 1989, the total number of persons arrested for larceny-theft increased 4 percent. Male and

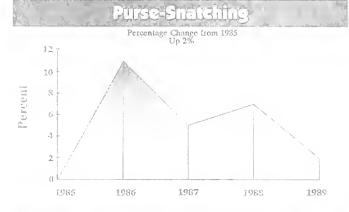

female arrests each rose 4 percent, also. During this same period, adult arrests were up 6 percent, while those of persons under 18 years of age showed no change.

Considering a longer timeframe, larceny-theft arrests jumped 12 percent for the 5-year period, 1985-1989. Those of adults were up 19 percent, while juvenile arrests declined 2 percent. During this 5-year timespan, male and female arrests rose 13 and 12 percent, respectively.

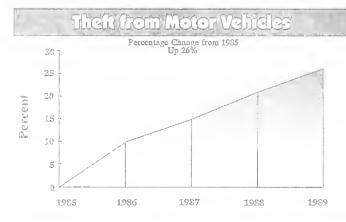

Larceny-thefts not only comprised the largest portion of Crime Index offenses reported to law enforcement, this offense accounted for 53 percent of the arrests for Index crimes and 69 percent of those for property crimes in 1989. Forty-three percent of the larceny arrests were of persons under 21 years of age, and 29 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1989, comprised 30 percent of all larceny-theft arrestees.

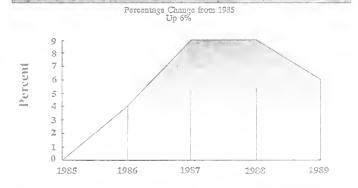

Whites accounted for 64 percent of the total larcenytheft arrests, blacks for 33 percent, and all other races for the remainder.

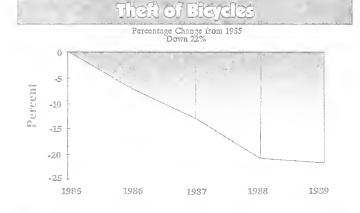

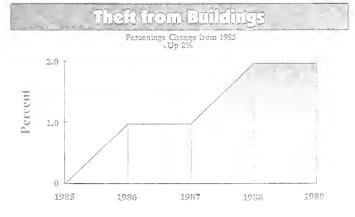

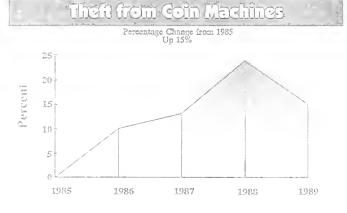

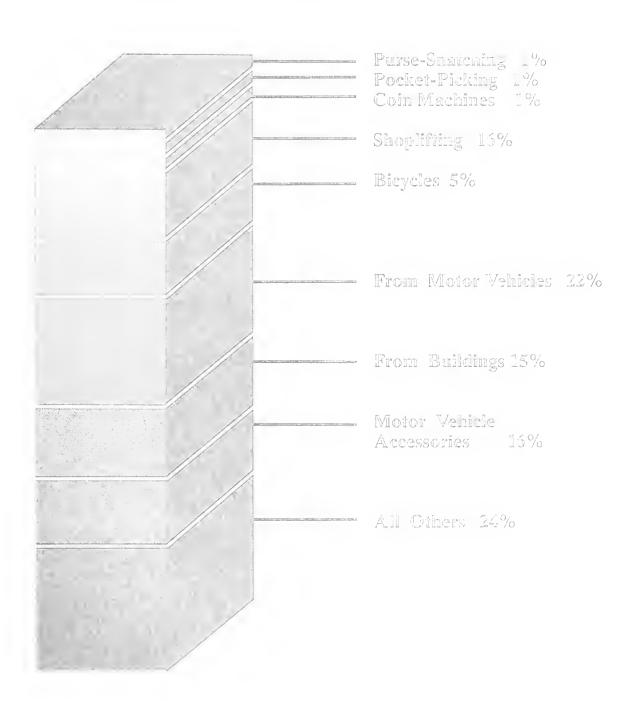

LARCENY-THEFT Percent Distribution by Type of thek 1989

MOTOR VEHICLE THEFT

____ DEFINITION _____

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

	TREND	·
Year	Number of offenses	Rate per 100,000 inhabitants
1988	1,432,916	582.9
1989	1,564,800	630.4
Percent change	+9.2	+8. I

Volume

An estimated total of 1,564,800 thefts of motor vehicles occurred in the United States during 1989. These offenses comprised 12 percent of all property crimes. The regional distribution of motor vehicle thefts showed 31 percent of the volume was in the Southern States, 26 percent in the Western States, 25 percent in the Northeastern States, and 18 percent in the Midwestern States.

The 1989 monthly figures show that the greatest numbers of motor vehicle thefts were recorded during August and October, while the lowest count was in February.

Motor Vehicle Theft by Month, 1985-1989

[Percent of annual total]

Months	1985	1986	1987	1988	1989
January	7.8	7.9	7.9	8.0	8.3
February	7.1	7.1	7.5	7.6	7.3
March		8.1	8.4	7.9	8.1
April	7.8	7.8	7.9	7.4	7.5
May	8.0	8.0	8.0	7.8	8.0
June	8.2	8.2	8.1	8.0	8.2
July	8.9	8.9	8.8	8.8	8.8
August		9.5	9.0	9.4	9.0
September	8.7	8.7	8.4	8.7	8.5
Oetober	9.1	9.0	8.8	9.0	9.0
November	8.6	8.5	8.5	8.7	8.7
December	8.7	8.3	8.7	8.7	8.5

Trend

The number of motor vehicle thefts increased 9 percent nationally from 1988 to 1989. This upward trend was evident in all population groups with cities having populations of 100,000 to 249,999 showing the largest increase, 13 percent. Suburban and rural counties showed increases of 8 percent and 3 percent, respectively.

Geographically, all four regions experienced motor vehicle theft increases. The increases were 12 percent in the Western Region, 10 percent in the Southern Region, 8 percent in the Northeastern Region, and 6 percent in the Midwestern Region.

The accompanying chart shows that the volume of motor vehicle thefts in 1989 increased 42 percent over the 1985 volume.

Rate

The 1989 national motor vehicle theft rate—630 per 100,000 people—was 8 percent higher than the rate in 1988. The rate was 36 percent higher than in 1985 and 26 percent above the 1980 rate.

For every 100,000 inhabitants living in MSAs, there were 771 motor vehicle thefts reported in 1989. The rate in cities outside metropolitan areas (other cities) was 221 and in rural counties, 117. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1989 motor vehicle theft rate was 1,602. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 251 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 775 per 100,000 people in the Western States to 471 in the Midwestern States. The Northeastern States' rate was 769 and the Southern States' rate, 572. All regions registered rate increases from 1988 to 1989. In both the Western and Southern States, the increase was 9 percent; in the Northeastern States, 8 percent; and in the Midwestern States, 6 percent.

An estimated average of 1 of every 121 registered motor vehicles was stolen nationwide during 1989. Regionally, this rate was greatest in the Northeast where 1 of every 86 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 102 in the West, 1 per 137 in the South, and 1 per 168 in the Midwest.

Nature

During 1989, the estimated value of motor vehicles stolen nationwide was over \$8 billion. At the time of theft, the average value per vehicle stolen was \$5,222.

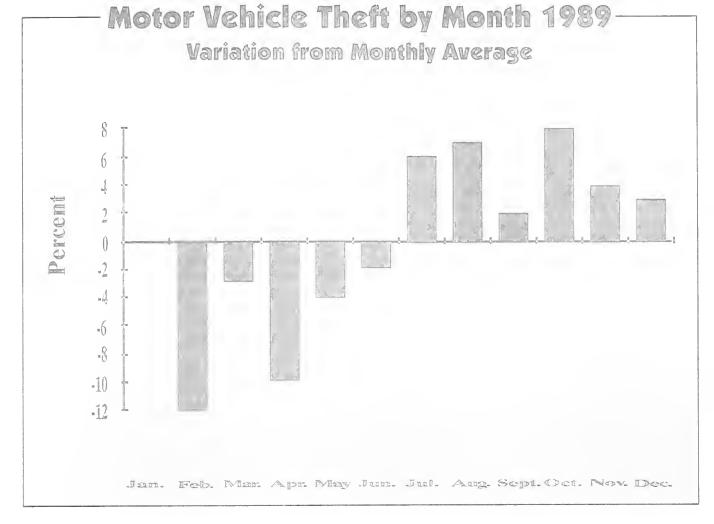

Seventy-nine percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

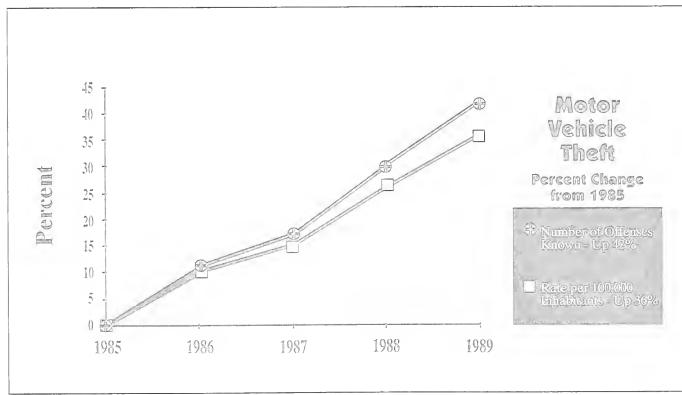

Motor Vehicle Theft, 1989

[Percent distribution by region]

Region	Total	Autos	Trucks and buses	Other vehicles
Total	100.0	78.8	14.8	6.4
Northeastern States	100.0 100.0 100.0 100.0	92.4 82.4 73.5 68.5	4.6 10.7 18.9 23.3	3.0 6.9 7.6 8.1

¹Because of rounding, percentages may not add to totals

Clearances

Law enforcement agencies nationwide cleared 15 percent of the motor vehicle thefts reported in their locales during 1989. Those in cities cleared 14 percent; those in suburban counties cleared 18 percent; and rural county agencies cleared 33 percent.

Regional clearance percentages for motor vehicle theft were 11 percent in the Northeastern States, 15 percent in the Western States, 18 percent in the Midwestern States, and 19 percent in the Southern States.

Persons in the under 18 age group alone accounted for 21 percent of the motor vehicle thefts cleared in the Nation and for 22 percent in the cities. They were responsible for 19 percent of the clearances in both the suburban and rural counties.

Persons Arrested

During 1989, males accounted for 90 percent of the persons arrested for motor vehicle theft. Fifty-five percent of the arrestees were white, 42 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1989, 60 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 41 percent of the total. Between 1988 and 1989, arrests of males under age 18 rose 13 percent, while those of females within the same age range increased 16 percent.

Total motor vehicle theft arrests were up 11 percent and adult arrests rose 10 percent in 1989 over the previous year. Overall arrests for this offense were 66 percent higher in 1989 than in 1985 and 50 percent above the 1980 level.

ARSON

D	F,	FI	N	1	П	O	N

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Volume

A total of 99,599 arson offenses was reported by 12,750 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1989. Of these reporting agencies, 12,562 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 6 through 13 and arson clearances in Tables 20 through 23. Since only 8,746 agencies covering 72 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

Trend

The number of arson offenses reported nationally declined 1 percent in 1989 as compared to the 1988 total. Counts for the Nation's cities and suburban counties dropped 1 and 4 percent, respectively, while the rural counties registered a 4-percent increase.

Geographically, arson decreases were experienced in the Midwest, 5 percent; in the Northeast, 3 percent; and in the South, 1 percent. A 3-percent increase was recorded in the West.

By property type nationally, the number of arsons of structures declined 5 percent; while arsons of mobile property increased 1 percent and those of all other property were up 2 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Arson Rate, Population Group, 1989

[8,746 agencies; 1989 estimated population 178,168,000; rate per 100,000 inhabitants]

Group	Rate	
Total	48.7	
Total cities	56.8	
Group I (cities 250,000 and over)	93,4	
(cities 1,000,000 and over)	102.6	
(cities 500,000 to 999,999)	86.2	
(cities 250,000 to 499,999)	84,4	
Group II (cities 100,000 to 249,999)	67.7	
Group III (cities 50,000 to 99,999)	48,2	
Group IV (cities 25,000 to 49,999)	34-8	
Group V (cities 10,000 to 24,999)	26.7	
Group VI (cities under 10,000)	26.2	
Suburban counties	35.6	
Rural counties	20 9	
Suhurban area	32.1	

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1989 rates are shown in the accompanying table.

The rates ranged from 103 per 100,000 inhabitants in cities with populations over 1 million to 21 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 36 and 57 per 100,000 inhabitants, respectively. Overall, the 1989 national arson rate was 49 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 58 offenses per 100,000 population. Following were the Northeastern States with a rate of 47 per 100,000 and the Southern and Midwestern States each with 45 per 100,000.

Nature

As in previous years, structures were the most frequent targets of arsonists in 1989 and comprised 54 percent of the reported incidents. Twenty-seven percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 19 percent.

Arson, Type of Property, 1989

[12,562 agencies, 1989 estimated population 194,737,000]

Property classification	Number of offenses	Percent distribution ¹
Total	80,580	100.0
Total structure	43,672	54.2
Single occupancy residential	19,220	23.9
Other residential	8,034	10.0
Storage	4,326	5.4
Industrial/manufacturing		.8
Other commercial		6.1
Community/public	4,008	5.0
Other structure	2,453	3.0
Total mobile	21.631	26.8
Motor vehicles		24.8
Other mobile	1,669	2.1
Other	15,277	19.0
		

¹Because of rounding, percentages may not add to totals

Residential property was involved in 62 percent of the structural arsons during the year, with 44 percent of such offenses directed at single-occupancy dwellings. Nineteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 92 percent of all mobile property at which arsons were directed.

Arson, Structures Not in Use, 1989

[12,562 agencies, 1989 estimated population 194,737,000]

43,672	18.8
19,220	23.8
8,034 4.326	12.6 21.5
682	12.0
4.949	11.5
.,	8.6 29.5

The monetary value of property damaged due to reported arsons averaged \$13,078 per incident in 1989. The overall average for all types of structures was \$21,410. While industrial/manufacturing property was the structural classification with the lowest reported number of offenses, it showed the highest average loss—\$113,778. Mobile properties averaged \$4,902 per incident, and other targets averaged \$835.

Arson, Monetary Value of Property Damaged, 1989

[12,562 agencies; 1989 estimated population 194,737,000]

Property classification	Numher of offenses	Average damage
Total	80,580	\$13,078

Community/public	4,008	16,652
Other structure)	26,128
Total mobile	21,631	4,902
Motor vehicles	19,962	4,636
Other mobile	1,669	8,078
Other	15,277	835

Clearances

The national 1989 arson clearance rate was 15 percent. Agencies in cities with fewer than 10,000 inhabitants showed the highest rate, clearing 24 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 22 percent; those in suburban counties, 18 percent; and city departments, 14 percent.

Regionally, the Southern States recorded a clearance rate of 20 percent; both the Western and Midwestern States. 14 percent; and the Northeastern States, 11 percent.

Thirty-nine percent of all 1989 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in this age group acounted for 37 percent of

structural arson clearances, 23 percent of the clearances for arsons of mobile property, and 55 percent of those of all other property.

Arson Offenses Cleared by Arrest, 1989

[12,562 agencies²; 1989 estimated population 194,737,000]

Property classification	Numher of offenses	Percent cleared by arrest
Total	80,580	17.6
Total structure	43,672	21.4
Single occupancy residential	19,220	21.1
Other residential		22.5
Storage	4,326	18.3
Industrial/manufacturing	682	15.0
Other commercial	4,949	15.6
Community/public	4.008	33.5
Other structure	2,453	19.2
Total mobile	21,631	9.3
Motor vehicles	19,962	8.9
Other mobile	1,669	14.1
Other	15,277	18.2

Includes offenses cleared by exceptional means.

²To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 41 percent of the city arson clearances, 38 percent of those in suburban counties, and 20 percent of those in the rural counties.

The accompanying tables show clearance data only for those 12,562 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (34 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (9 percent) was registered for motor vehicles.

Arson Offenses Cleared by Arrest¹ of Persons under 18 Years of Age, 1989

[12,562 agencies²; 1989 estimated population 194,737,000]

Property classification	Total clearances	Percent under 18
Total	14,153	38.9
Total structure	9,350	37.8

Other mobile	235	36.6
Other	2,788	54.2

⁴Includes offenses cleared by exceptional means

²To be included in this table, it was necessary that arson clearances be reported by property classification.

Persons Arrested

The estimated number of arrests for arson during 1989 totaled 18,600. Forty-three percent of the arrestees were under 18 years of age and 64 percent were under 25. Males comprised 86 percent of all arson arrestees. Seventy-four percent of those arrested were white, 25 percent were black, and the remainder were of other races.

Trends for 1988 versus 1989 show arson arrests decreased 4 percent nationwide. While rural county agencies

experienced a 4-percent increase, declines were experienced in the Nation's cities, 5 percent; and in the suburban counties, 1 percent.

Nationwide, arrests of both adults and juveniles decreased from 1988 to 1989, 6 and 1 percent, respectively. During the same period, male arrests for arson were down 4 percent and female arrests, down 1 percent.

The 1989 arson arrest total for all ages was 7 percent below the 1985 level and 11 percent lower than in 1980.

CRIME INDEX TABULATIONS

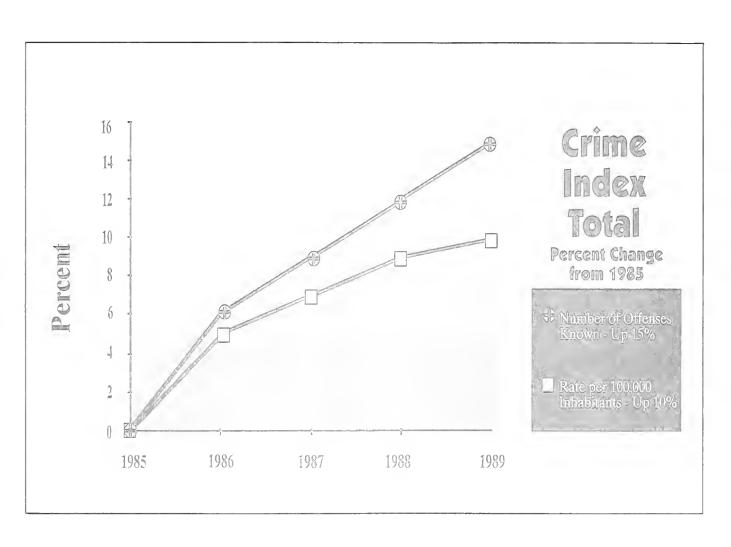

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

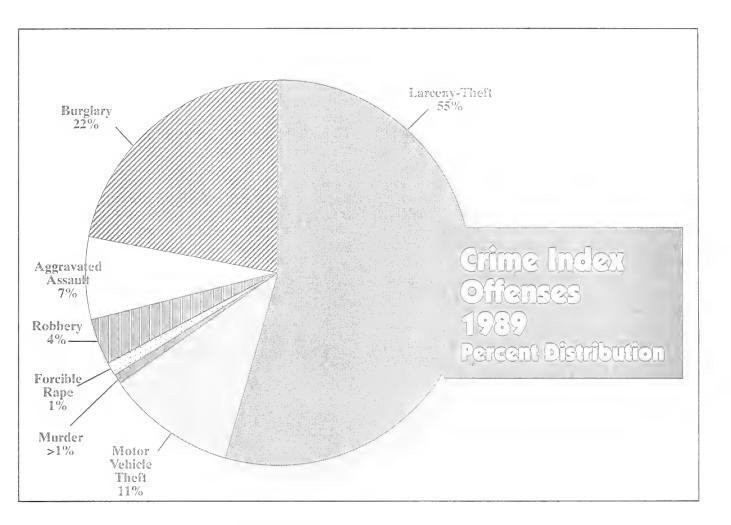

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page v of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1989 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.

Regional Violent and Property Crime Rates 1989

(per 100,000 înhabitants)

Crime Index Total

The Crime Index total rose 2 percent to 14.3 million offenses in 1989. Five- and 10-year percent changes showed the 1989 total was 15 percent above the 1985 level and 6 percent higher than in 1980.

From 1988 to 1989, overall violent crime showed a 5percent increase. The number of property crimes increased 2 percent for the 2-year period.

The largest volume of Crime Index offenses occurred in the Southern States which accounted for 37 percent of the total. Following were the Western States with 24 percent, the Midwestern States with 21 percent, and the Northeastern States with 18 percent.

Crime rates relate the incidence of crime to population. In 1989, there were an estimated 5,741 Crime Index offenses for each 100,000 in population nationwide. The violent crime rate was 663, and for property crime, it was 5,078 per 100,000.

Regionally, the Crime Index rates per 100,000 inhabitants ranged from 6,550 in the West to 4,949 in the Midwest. The South registered a rate of 6,205 per 100,000 inhabitants, and the Northeast, 5,072.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in Table 1, "Index of Crime, United States, 1980-1989."

Table 2, "Index of Crime, United States, 1989," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

Table 1.—Index of Crime, United States, 1980-1989

Populations are Bureau of the Census provisional estimates as of July 1, except April 1, 1980, preliminary census counts, and are subject to change. ²Because of rounding, the offenses may not add to totals.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1989," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to

consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1989, they also represented the greatest regional population.

Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

All rates were calculated on the offenses before rounding.

Data for 1988 were not available for the States of Florida and Kentucky; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation", page 3 for details.

Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Will remes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for

the property crime of arson.

The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson

³Because of rounding, percentages may not add to totals

¹Populations are Bureau of the Census provisional estimates as of July 1, 1988 and 1989, and are subject to change

²Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense

³Violent crimes are offenses of murder, foreible rape, robbery, and aggravated assault. Property crimes are offenses of hurglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Forcible rape figures furnished by the state-level Umform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national

⁴Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1988 and 1989 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation," page 3 for details.

Includes offenses reported by the Zoological Police

^{*}Data for 1988 were not available for the States of Florida and Kentucky, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 3 for details, "Population and offense data are not included in U.S. totals.

Offense totals are based on all reporting agencies and estimates for unreported areas

Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Violent crimes are offenses of murder, foreible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson. Includes offenses reported by the Zoological Police. Foreible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR. Program administered by the Illinois Department of State Police were not in accordance with national UCR. guidelines. The 1989 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state total is shown. See "Offen Estimation," page 3 for details

Table 6.-Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1989

* Arson is shown only if 12 months of arson data were received. Leaders (,) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

¹Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

Table 7.—Number of Offenses Known to the Police, Universities and Colleges, 1989

The student enrollment figures provided by the United States Department of Education are for 1988, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix I for details

endedines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

NOTE, Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³Properly crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Student enrollment figures were not available.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR

Table 8.-Number of Offenses Known to the Police, Suburban Counties, 1989

[The data shown in this table do not reflect county totals but are the number of offenses reported by the shortiffs office county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Leaders (-) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non- negligent man- slaughter	Forcible rape	Robbery	Aggra- vated assault	Burglary	Larceny- theft	Motor vehicle theft	Arson*

¹Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

Table 9.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1989

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

¹The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Includes state police agencies with no county breakdown.

Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1988 were not available for the States of Florida and Kentucky. See "Offense Estimation," page 3 for details.

The number of agencies used in arson trends are less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson ²Violent crimes are offenses of murder, foreible rape, robbery, and aggravated assault.

Property crimes are offenses of hurglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

^{*}Crime offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.
Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR. guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1988 were not available for the States of Florida and Kentucky. See "Offense Estimation," page 3 for details.

SECTION III

CRIME INDEX OFFENSES CLEARED

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies cleared 21 percent of the Crime Index offenses brought to their attention during 1989. A 46-percent clearance rate for the violent crimes collectively was recorded. Among the violent offenses, the rates were 68 percent for murder, 52 percent for forcible rape, 26 percent for robbery, and 57 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

The overall property crime clearance rate was 18 percent. Fourteen percent of the burglaries, 20 percent of the larceny-thefts, and 15 percent of both motor vehicle thefts and arsons were cleared during the year. When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

Regionally, the highest total Crime Index clearance rates were registered in the South and West, each with 22 percent. In both the Midwest and Northeast, the rates were 20 percent. The South recorded the highest violent crime clearance rate, 50 percent. Following were the West with

47 percent, the Midwest with 44 percent, and the Northeast with 40 percent. Property crime clearance rates were 19 percent in the South, 18 percent in both the West and Midwest, and 16 percent in the Northeast.

By community type, rural county law enforcement agencies showed clearances for 22 percent of the Crime Index offenses brought to their attention. Those in cities cleared 21 percent, and those in suburban counties, 20 percent. Of the population groups, cities with 10,000 to 24,999 inhabitants registered the highest total Crime Index and property crime clearance rates, 25 and 23 percent, respectively. The highest violent crime clearance rate was in the rural counties, 62 percent.

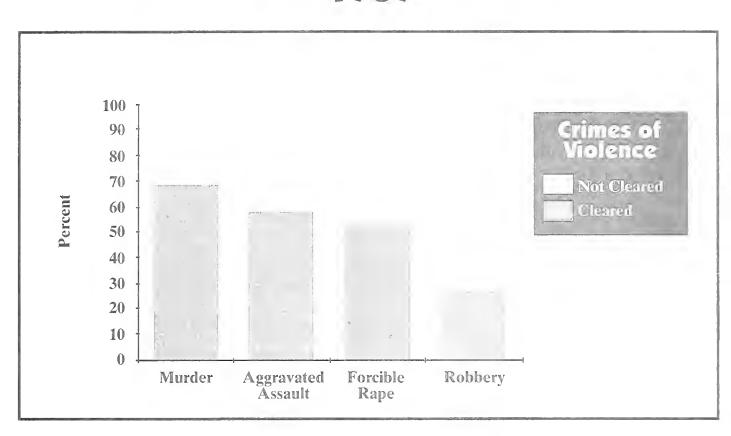

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) accounted for 26 percent of the United States population, according to 1989 Bureau of the Census projected population figures.

Eighteen percent of the Crime Index offenses cleared by law enforcement during 1989 involved only young people under age 18. Persons in this age group accounted for 10 percent of the violent crime clearances and 20 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (7 percent), while the highest percentage was shown for arson (39 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under-18 age group—22 percent. Juveniles alone were the offenders in 20 percent of the clearances in the Western States, 17 percent of those in the Northeastern States, and 14 percent of those in the Southern States.

¹Includes offenses cleared by exceptional means.

The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

4Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories. Data for 1989 were not available for the State of Florida. See "Offense Estimation", page 3 for details

SECTION IV

PERSONS ARRESTED

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 14.3 million arrests in 1989 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for driving under the influence, 1.7 million; larceny-theft, 1.6 million; and drug abuse violations, 1.4 million.

When the arrest volume was related to the total United States population, the rate was 5,625 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest rate, 7,792, while those with populations from 10,000 to 24,999 recorded the lowest rate, 5,138. For suburban county agencies overall, the arrest rate was 4,339, and for rural county law enforcement, it was 3,502 per 100,000 inhabitants.

Regionally, the arrest rates per 100,000 population ranged from 5,134 in the Midwest to 6,403 in the West. The Northeast recorded an arrest rate of 5,332 and the South, 5,613.

Due to reporting problems, only state arrest totals, by offense, were received for Florida. Tables showing the age, sex, or race of persons arrested, therefore, contain no Florida data.

Arrest Trends

The national total number of arrests for all offenses except traffic violations increased 7 percent in 1989 as compared to the 1988 volume. During the same time period, adult arrests rose 7 percent, while those of persons under 18 years of age showed a 2-percent increase. When considering only the eight Crime Index offenses, increases were recorded for arrests of persons of all ages, 6 percent; of adults, 7 percent; and of juveniles, 3 percent. Overall violent crime arrests were up 9 percent and property crime arrests, 5 percent.

Two-year trends in total arrests for city agencies showed a 6-percent rise, 1989 over 1988. Suburban county arrests were up 10 percent and rural county arrests, 8 percent.

Over the 5-year period beginning in 1985, total arrests for all offenses were up 14 percent, with adult arrests up 17 percent and those of persons under 18 years of age up 2 percent. Total Crime Index arrests increased 17 percent, those of adults rose 24 percent, and arrests of juveniles under 18 years of age were up 3 percent. During the same years, 1985-1989, total violent crime arrests increased 34 percent, and property crime arrests were up 13 percent.

For the decade, 1980-1989, arrests for all offenses were up 28 percent; Crime Index arrests, 19 percent; violent crime arrests, 35 percent; and property crime arrests, 15 percent.

The 1989 drug abuse violation arrest total was 20 percent above the 1988 figure, 55 percent higher than in 1985, and 126 percent higher than in 1980. The types of drugs involved in violations resulting in arrests during 1989 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations, 1989

¹ Because of rounding, percentages may not add to totals.

Age

Five percent of all persons arrested nationally in 1989 were under the age of 15; 15 percent were under 18; 30 percent were under 21; and 46 percent were under 25. Persons in the under-25 age group accounted for 47 percent of arrests in the cities, 42 percent of those in the suburban counties, and 40 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 27 percent were under the age of 18; 42 percent, under 21; and 56 percent, under 25. The under-25 age group was also responsible for 46 percent of the violent crime arrests and 59 percent of property crime arrests in 1989.

Lareeny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence.

Sex

Eighty-two percent of the persons arrested in the Nation during 1989 were males. They accounted for 79 percent of Index crime arrests, 89 percent of those for violent crimes, and 76 percent of the property crime arrests. Men were most often arrested for driving under the influence, which accounted for 13 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 77 percent of arrests of women for Index crimes and 19 percent of all female arrests. Fifty-one

percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 6-percent increase in the number of male arrests from 1988 to 1989 and an 8-percent rise in female arrests for the same period. Arrests of males were up 13 percent and those of females up 19 percent for the 5-year period from 1985 to 1989.

Race

Race distribution figures for the total number of arrests in the United States during 1989 showed 67 percent of the arrestees were white, 31 percent were black, and the remainder were of other races. Whites accounted for 61 percent of the Index crime arrests, 51 percent of the arrests for violent crimes, and 64 percent of those for property erimes.

Table 24.—Total Estimated Arrests¹, United States, 1989

Law Enforcement Code of Ethics

As a Lam Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the luws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.

SECTION V

LAW ENFORCEMENT PERSONNEL

The Nation's law enforcement community employed an average of 2.2 full-time officers for every 1,000 inhabitants as of October 31, 1989. Considering full-time civilians, the overall law enforcement employee rate was 2.9 per 1,000 inhabitants according to 12,218 city, county, and state police agencies reporting in 1989. These agencies collectively offered law enforcement service to a population of nearly 230 million, employing 496,353 officers and 180,294 civilians.

Varying demographic and other jurisdictional characterstics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly liverse throughout the Nation. In certain areas, sheriffs' esponsibilities are limited almost exclusively to civil unctions and/or the administration of the county jail acilities. Likewise, the responsibilities of state police and

highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1989 was 2.7 per 1,000 inhabitants. By population grouping, city law enforcement employee averages were lowest in those with populations from 10,000 to 99,999, 2.2 per 1,000 inhabitants. The Nation's smallest cities, those with fewer than 10,000 inhabitants, employed 2.9 employees per 1,000 population, while for the largest cities (over 250,000 population) the rate was 3.5 per 1,000. Rural and suburban counties averaged full-time law enforcement employee rates of 3.6 and 3.3 per 1,000 population, respectively.

Regionally, the highest law enforcement employee rates were in the Northeast and South, each with 2.9. In the Midwest the rate was 2.5, and in the West, 2.4.

Includes civilians. Population figures were rounded to the nearest thousand. All rates were calculated before rounding

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.1 officers per 1,000 inhabitants. By population grouping, the rates ranged from 1.7 for cities with populations of 25,000 to 99,999 to 2.7 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.2 officers per 1,000 population, while agencies in rural counties averaged 2.4.

Geographically, the highest rate of officers to population was recorded in the Northeastern States where there were 2.4 officers per 1,000 inhabitants. Following were the Southern States with 2.2, the Midwestern States with 2.0, and the Western States with 1.7.

Males comprised 92 percent of all sworn employees nationally and in all cities collectively. Ninety-four percent of the officers in rural counties and 89 percent of those in suburban counties were males.

Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

Civilian Employees

Civilians made up 27 percent of the total United States law enforcement employee force in 1989. They represented 22 percent of the police employees in cities, 33 percent of those in rural counties, and 34 percent of the suburban county law enforcement strength.

Law Enforcement Officers Killed and Assaulted

Sixty-seven law enforcement officers were feloniously slain in the line of duty during 1989. The 1989 total was the lowest in the decade with the exception of 1986 when 66 officers were slain. Accidents occurring while performing official duties claimed the lives of an additional 78 officers in 1989.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted*.

Number of employees		Number of employees	
Average number of employees per 1,000 inhabitants	2.8	Average number of employees per 1,000 inhabitants	3.4

Includes civilians

The New England Division's law enforcement employee volumes are lower than those published in previous years, because limited 1989 data were available from Massachusetts agencies.

Only one city with a population of 250,000 and over is located in the New England geographic division. The 1989 data were not available for this agency.

Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups. Population

Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities, Suburban cities and counties are also included in other groups. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

SECTION VI APPENDIX I

TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

- Key: A) Column 1 shows the table numbers. Included are Tables 1 through 64, Crime in the United States 1989.
 - B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.
- C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.
- D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
ı	All law enforcement agencies in the UCR Program (including those submitting less than 12 months)	The 1989 statistics are consistent with Table 2. Pre- 1989 crime statistics may have been updated, and hence, may not be consistent with prior publica- tions. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statis- tics represent July 1 provisional estimations for each year except April 1, 1980. Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1980 to 1989.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1989).	Statistics are aggregated from individual state statis- tics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1989, Bureau of the Census provisional estimates. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1989.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1989).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1989, Bureau of the Census provisional estimates.	Represents the 1989 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1989 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1988 and 1989. Population statistics represent July 1 provisional estimates for 1988 and 1989.	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1989).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1989, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1989.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1989, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1989.	The 1988 student enrollment figures, which are provided by the U. S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	These agencies are listed alphabetically by
8	All law enforcement agencies submitting complete reports for 12 months in 1989.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1989.	enforcement agencies in suburban counties,

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
9	All law enforcement agencies submitting complete reports for 12 months in 1989.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1989, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the indi-
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1988 and 1989.	The 1989 crime trend statistics are 2-year comparisons based on 1989 reported crime activity. Only common reported months for individual agencies are included in 1989 trend calculations. Populations represent July 1, 1989, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1989.	The 1989 crime rates are the ratios of the aggregated 1989 crime volumes and the aggregated 1989 populations of the contributing agencies. Population statistics represent July 1, 1989, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Illinois state-level UCR Program were not in accordance with national guidelines. For inclusion in these tables, the forcible rape figures were estimated by using the national rates for each population group applied to
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1989.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1988 and 1989.	For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1989.	The 1989 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1989. Population statistics represent July 1 estimates for individual agencies. See Appendix III for UCR population breakdowns.	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1989).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to July 1, 1989, estimates).	
25, 26	All law enforcement agencies submitting complete reports for 12 months in 1989.	The 1989 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1989 reported arrest statistics and population. The population statistics represent July 1, 1989, estimates for individual agencies. See Appendix III for UCR population classifications/geographical configuration.	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1980 and 1989.	The arrest trends are the percentage differences between 1980 and 1989 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1989, estimates.	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1985 and 1989.	The arrest trends are the percentage differences between 1985 and 1989 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1989, estimates.	
31, 32	All law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.	The arrest trends are 2-year comparisons between 1988 and 1989 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1989, estimates.	
33-38	All law enforcement agencies submitting complete reports for 12 months in 1989.		Slight decrease in coverage for Table 38 due to editing procedure and lower submission of race data.

(1)	(2)	(3)	(4)
(, ,	Data Base	Table Construction	General Comments
39, 40	All city law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.	The 1989 city arrest trends represent the percentage differences between 1988 and 1989 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41-44	All city law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 44 due to editing procedure and lower submission of race data
45, 46	All suburban county law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.	The 1989 suburban county arrest trends represent percentage differences between 1988 and 1989 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III)	
47-50	All suburban county law enforcement agencies submitting complete reports for 12 months in 1989.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 50 due to editing procedure and lower submission of race data.
51, 52	All rural county law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.	The 1989 rural county arrest trends represent percentage differences between 1988 and 1989 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. 111).	
53-56	All rural county law enforcement agencies submitting complete reports for 12 months in 1989.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 56 due to editing procedure and lower submission of race data.
57, 58	All suburban area law enforcement agencies submitting complete reports for 12 months in 1988 and 1989.		
59-62	All suburban area law enforcement agencies submitting complete reports for 12 months in 1989.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 62 due to editing procedure and lower submission of race data.
63	All law enforcement agencies submitting complete reports for 12 months in 1989.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1989.	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
64	All law enforcement agencies submitting complete reports for 12 months in 1989.	Population statistics represent July 1, 1989, estimates for individual agencies. See Appendix III for definitions of the population classifications pre- sented.	age definitions for juveniles.

APPENDIX II

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part 1 crime, it is not included in the Crime Index.

Forcible rape.—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery.—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded

from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.— Buying, receiving, and possessing stolen property, including attempts.

Vandalism.—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice).—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.—State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling.—Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.—Nonsupport, neglect, descrition, or abuse of family and children.

Driving under the influence.—Driving or operating ny vehicle or common carrier while drunk or under the **nfluence** of liquor or narcotics.

Liquor laws.—State or local liquor law violations, xcept "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.—Offenses relating to drunkenness or **ntoxication**. Excluded is "driving under the influence."

Disorderly conduct.—Breach of the peace.

Vagrancy.—Vagabondage, begging, loitering, etc.

All other offenses.—All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.—No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18).— Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways—(persons under age 18)—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

UNIFORM CRIME REPORTING AREA DEFINITIONS

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *State Metropolitan Area Data Book*, 1986 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city and contiguous counties having strong economic and social relationships to the central city and county are also included. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 77 percent of the total United States population in 1989. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 9 percent of the 1989 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1989.

The following diagram illustrates the aforementioned discussion of the community types.

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	OTHER CITIES
	SUBURBAN CITIES	CITIES
COUNTIES (Unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are:

	Political	Population
Population Group	Label	Range
1	City	250,000 and over
11	City	100,000 to 249,999
111	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City¹	Less than 10,000
VIII (Rural County)	County ²	N/A
1X (Suburban County)	County ²	N/A

¹ Includes universities and colleges to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. To obtain the 1989 figures, for example, state growth rates, as supplied by the Bureau of the Census, were applied to every county within each state, and then to all jurisdictions within each county. The base figures were 1988 Bureau of the Census provisional estimates for all cities and counties.

The following table shows the number of UCR contributing agencies within each population group for 1989.

Population	Number of	Population
Group	Agencies	Covered
1	63	45,293,015
11	126	18,511,293
III	338	23,217,449
tv	714	24,560,650
V	1,716	26,899,789
VI	7,4 t 71	25,214,950
VIII (Rural County)	$3,693^2$	34,204,206
1X (Suburban County)	$1,683^2$	50,341,648
Total	15,750	248,243,000 ³

⁴Includes universities and colleges to which no population is attributed.

² Includes state police to which no population is attributed.

²Includes state police to which no population is attributed.

³Because of rounding, the population covered does not add to total.

legions and Divisions

As shown in the accompanying map, the United States is omprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western tates. These regions are further divided into nine divisions. The following table delineates the regional, divisionly, and state configuration of the country.

NORTHEASTERN STATES

lew England Connecticut Maine Massachusetts New Hampshire Rhode Island Middle Atlantic New Jerscy New York Pennsylvania

MIDWESTERN STATES

ast North Central Illinois Indiana Michigan Ohio Wisconsin

Vermont

West North Central lowa

Kansas Minnesota Missouri Nebraska North Dakota South Dakota

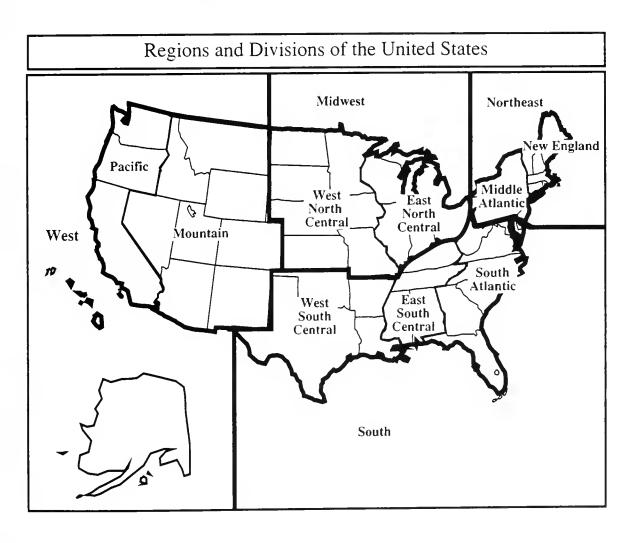

SOUTHERN STATES

South Atlantic East South Central Delaware Alabama District of Columbia Kentucky Florida Mississippi Tennessee Georgia West South Central Maryland North Carolina Arkansas South Carolina Louisiana Oklahoma Virginia West Virginia Texas

WESTERN STATES

Mountain
Arizona
Colorado
Idaho
Montana
Nevada
New Mexico
Utah
Wyoming

Pacific Alaska California Hawaii Oregon Washington

APPENDIX IV

THE NATION'S TWO CRIME MEASURES

The U. S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the United States: the Uniform Crime Reporting (UCR) Program and the National Crime Survey (NCS). Because of differences in methodology and crime coverage, the results from the two programs are not strictly comparable nor consistent. By complementing each other's findings, the two programs enhance our understanding of the Nation's crime problem.

UNIFORM CRIME REPORTS

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

The UCR data are compiled from monthly law enforcement reports made directly to the FBI or to centralized state agencies that then report to the FBI. Each report submitted to the UCR Program is examined thoroughly for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies.

Law enforcement agencies active in the UCR Program represent approximately 240 million United States inhabitants—98% of the total U. S. population.¹

The UCR Program provides crime counts for the Nation as a whole, as well as for regions, states, counties, cities, and towns. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

UCR findings for each calendar year are published initially in a preliminary release in the spring followed by a detailed annual report, *Crime in the United States*, issued in the summer following the calendar year. In addition to information on crime counts and trends, this report includes detailed data on crimes cleared, persons arrested (age, sex, race) for a wide range of crimes, law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims, victim-offender relationships, weapon used, and circumstances surrounding the homicides). Other special reports are also available from the UCR Program.

Following a 5-year redesign effort, the UCR Program is currently converting to a more comprehensive and detailed

reporting system, called the National Incident-Based Reporting System (NIBRS). NIBRS will provide detailed information about each criminal incident in 22 broad categories of offenses.

NATIONAL CRIME SURVEY

The Bureau of Justice Statistics' (BJS) NCS, which began in 1973, collects detailed information on the frequency and nature of the crimes of rape, personal robbery, aggravated and simple assault, household burglary, personal and household theft, and motor vehicle theft. It does not measure homicide or commercial crimes (such as burglaries of stores).

Interviews are conducted by U. S. Census Bureau personnel with all household members at least 12 years old in a nationally representative sample of approximately 49,000 households (about 101,000 persons). Households stay in the sample for 3 years and are interviewed at 6-month intervals. New households rotate into the sample on an ongoing basis.

The NCS collects information on crimes suffered by individuals and households, whether or not those crimes were reported to law enforcement. It estimates the proportion of each crime type that was reported to law enforcement, and it details the reasons given by victims for reporting or not reporting.

The survey provides information about victims (age, sex, race, ethnicity, marital status, income, and educational level), their offenders (sex, race, approximate age, and victim-offender relationship), and the crimes (time and place of occurrence, use of weapons, nature of injury, and economic consequences). Questions recently added to the survey cover the experiences of victims with the criminal justice system, details on self-protective measures used by victims, and possible substance abuse by offenders. Periodically, supplements are added to the survey to obtain detailed information on special topics such as school crime.

Findings from the NCS for each calendar year are published in a press release the following April (preliminary data), in a BJS Bulletin in the fall presenting summary final data, and in a detailed report the following June covering all NCS variables. Each year BJS staff develop Special and Technical Reports on specific crime topics.

COMPARING UCR AND NCS

As the previous description illustrates, there are significant differences between the two programs. The NCS, for example, includes crimes both reported and not reported to law enforcement, but it excludes homicide, arson,

¹ Population coverage is according to 1988 figures.

commercial crimes, and crimes against children under age 12 (all of which are included in the UCR Program). The UCR captures crimes reported to law enforcement, but it excludes simple assaults from the Crime Index. Moreover, even when the same crimes are included in the UCR and NCS, the definitions vary.

Another difference is the way that rate measures are presented for crimes such as burglary, household theft, and motor vehicle theft in the two programs. The UCR rates for these crimes are largely per-capita (number of crimes per 100,000 persons), whereas the NCS rates for these crimes are per-household (number of crimes per 1,000 households). Because the number of households may not grow at the same rate each year as the total population, trend data for rates of household crimes measured by the two programs may not be comparable.

In any large-scale data collection program, there are many possible sources of error. For example, in the UCR Program, a police officer may classify a crime incorrectly, and in the NCS a Census Bureau interviewer may incorrectly record the responses given by a crime victim. Crime data may also be affected by how the victim perceives and recalls the event. Moreover, as data are compiled and processed, clerical errors may be introduced at any stage. Both the UCR and NCS programs employ extensive accuracy checks at various stages in the data collection process to minimize errors.

As noted above, the NCS is based on an extensive, scientifically selected sample of American households. Thus, every crime measure presented in NCS reports is an estimate for the Nation based on results obtained from the sample. Estimates based on a sample have sampling variation, or a margin of error (which defines a confidence interval) associated with each estimate. This means that if another sample is drawn, there is a certain probability that the resulting estimate would be somewhat different from the original one. If the survey were repeated many times with different samples, the resulting estimates would converge around the actual measure for the entire popula-

tion. Rigorous statistical methods are used for calculating the magnitude of the sampling variation associated with the NCS estimates. Trend data in NCS reports are described as genuine year-to-year changes only if there is at least a 90% certainty that the measured changes are not the result of sampling variation. The UCR data are based on the actual count of offenses reported by law enforcement jurisdictions. In some circumstances UCR data are estimated for nonparticipating jurisdictions or those reporting partial data.

Some differences in data from the two programs may result from the fact that NCS estimates are subject to sampling variation. Apparent discrepancies between statisties from the two programs can usually be resolved by comparing NCS sampling variations (confidence intervals) with UCR statistics. Year-to-year changes in individual crime categories reported by the UCR usually fall within the confidence intervals of the NCS estimates, indicating no statistically significant differences between the output of the two programs. Even should the UCR changes fall outside the intervals, incompatibility of statistics should not be assumed. To illustrate, when differences between UCR and NCS occur, there is a 10% chance they are due to sampling variation because of the 90% confidence level established by NCS. It should also be noted that definitional and procedural differences between the UCR and NCS programs can account for apparent discrepancies in data output.

As has been discussed throughout, the results of UCR and NCS are not strictly comparable for a variety of reasons. Data users, however, possessing the basic understanding of each program's objectives, methodology, and coverage, can use the output from each in a complementary manner to better assess crime occurrence, losses, law enforcement involvement, arrestee descriptive information, and victimization data. By properly utilizing both programs in tandem, the crime issues in this country can be viewed in a much broader, more complete scope.

Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 6.

Although arson data are included in the trend and clearance tames, surricent data are not available to comman totals for the foreigness of murder, foreignes are personable trapes, robbery and aggravated assault.

Property crimes are offenses of hurgary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.
